Red lead, also known as lead tetroxide, is an inorganic compound with the chemical formula Pb_3O_4 , a bright red or orange solid. When grinding machine tools, red lead powder and engine oil are used as the developer during scraping. Mix red lead powder and engine oil in a certain ratio, thicker for coarse scraping and thinner for fine scraping. You can see the surface of the scraper plate shining where the developer was scraped off. Use the scraper to scrape off all the high spots. Repeat the above operations until the number of scraped points on the plate surface reaches the specified requirement.
