Abstracts

The global Redispersible Polymer Powder market size is expected to reach \$ 2029.8 million by 2029, rising at a market growth of 2.1% CAGR during the forecast period (2023-2029).

The key manufactures of the Redispersible Polymer Powder in the world are Wacker, DCC, Celanese, Wanwei, Organik Kimya, Shandong Xindadi, VINAVIL and Dow, among which the top three producers account for nearly 60% of the market share, and Wacker is the largest producer. The global production of redispersible polymer powder is mainly distributed in North America, Europe and China. The top three production regions account for more than 90% of the market share, and China is the largest production region at present. As far as its products are concerned, the growth rate of VAE-Veo Va products is relatively fast. At present, the market share of VAE products is the highest, more than 80%. In terms of its application, construction and tile adhesives are the largest application fields, accounting for more than 30% of the market share, followed by exterior insulation and finish systems, putty powder and dry-mix mortars..

Latex Powder or Redispersible Polymer Powder is a free-flowing organic polymer powder, produced through the spray drying of a wide range of monomers such as vinyl acetate, vinyl acetate, ethylene, acrylate, and styrene butadiene.

Redispersible Polymer Powder are used mainly in diverse construction chemical applications such as external thermal insulation composite systems, construction and tile adhesives, screed, self-leveling flooring compounds, plasters, repair mortars, grouts, and cementitious sealing slurries. Demand for re-dispersible polymer is continuously increasing due to its benefits in the construction industry such as better water retention and workability, strong strength development of the mortar, higher flexural strength and

flexibility, and strong impact and abrasion resistance.

This report studies the global Redispersible Polymer Powder production, demand, key manufacturers, and key regions.
