## Abstracts

According to our (Global Info Research) latest study, the global Reduced Instruction Set Computers market size was valued at US\$ 39512 million in 2025 and is forecast to a readjusted size of US\$ 71845 million by 2032 with a CAGR of 8.9% during review period.

In 2025, global Reduced Instruction Set Computer output reached about 24 billion units and global capacity of around 28 billion units. The average price is about USD 1.6 per unit, with gross margins near 52%. Reduced Instruction Set Computers (RISC) are microprocessors or processor architectures designed around a simplified instruction set that enables faster execution, lower power consumption, and more efficient chip design compared with Complex Instruction Set Computing (CISC) architectures. RISC processors typically use a load/store architecture, fixed-length instructions, pipelining, and a large number of general-purpose registers, making them widely adopted in smartphones, embedded systems, automotive electronics, networking equipment, AI edge devices, industrial automation, servers, and consumer electronics. Major RISC architectures include ARM, RISC-V, MIPS, Power ISA, and SPARC. The supply chain of RISC computers starts upstream with semiconductor raw material suppliers (silicon wafers, specialty chemicals, photoresists, substrates), Electronic Design Automation (EDA) software providers, and IP core developers such as Arm Holdings and RISC-V International. Midstream participants include fabless chip designers like Qualcomm, MediaTek, and Apple, foundries such as TSMC and Samsung Electronics, as well as outsourced semiconductor assembly and testing (OSAT) providers. Downstream, RISC processors are integrated into smartphones, IoT devices, automotive ECUs, industrial controllers, networking equipment, laptops, and cloud servers by OEMs including Dell Technologies, Lenovo, Huawei, and automotive manufacturers, with software

ecosystem support from Linux distributions, Android developers, compiler vendors, and embedded operating system providers.
