According to our (Global Info Research) latest study, the global Refractories market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Refractories are heat-resistant materials that constitute the linings for high-temperature furnaces and reactors and other processing units. In addition to being resistant to thermal stress and other physical phenomena induced by heat, refractories must also withstand physical wear and corrosion by chemical agents. ASTM C71 defines refractories as 'non-metallic materials having those chemical and physical properties that make them applicable for structures, or as components of systems, that are exposed to environments above 1,000 °F (811 K; 538 °C)'.

Refractories are produced from natural and synthetic materials, usually nonmetallic, or combinations of compounds and minerals such as alumina, fireclays, bauxite, chromite, dolomite, magnesite, silicon carbide, zirconia, and others.

In the Mexican market, The major manufacturers are RHI AG, Magnesita, Vesuvius, Plibrico, Morgan Advanced Materials, Saint-Gobain, EKW Refractorios, McKeown International, Refratechnik Mexico, PIRO, Zedmex, Sajuri, Refleon, Ratsa, Refractorios Naucalpan and ASC Mexico, etc.
