Abstracts

According to our (Global Info Research) latest study, the global Refrigerated Bakery Display Cases market size was valued at US\$ 746 million in 2025 and is forecast to a readjusted size of US\$ 939 million by 2032 with a CAGR of 3.4% during review period.

Refrigerated bakery display cases are a type of low-temperature display equipment specifically designed for baked goods such as cakes, desserts, breads, mousses, and cream products. They are typically maintained in a refrigerated temperature range of 2–10°C to preserve the texture, moisture, and appearance of the food. Their core value lies in solving problems such as the perishability of baked goods, the melting of creams, insufficient display effects, and high hygiene risks through stable temperature control, high-definition display, and anti-fog glass structures. This allows bakeries and catering establishments to improve sales conversion while maintaining quality. The average price of this product is approximately US\$580 per unit, with global sales of approximately 1.25 million units.

The demand for refrigerated bakery display cases is growing rapidly with the upgrading of global baking consumption, driven by three factors: first, the shift of baked goods from 'holiday consumption' to 'daily consumption,' significantly increasing the requirements for display effects and preservation capabilities in stores; second, the expansion of dessert shops, cafes, and light catering businesses has promoted the widespread adoption of aesthetically pleasing and highly transparent display cases; and third, increasingly stringent food safety regulations have made temperature control recording, hygiene design, and energy efficiency key purchasing priorities. In the future, bakery display cases will evolve towards energy-saving glass, intelligent temperature control, humidity management, IoT monitoring, and natural working materials. However,

the industry also faces risks such as fluctuating raw material costs, stricter energy efficiency regulations, and increased store rental pressure, which may affect the equipment upgrade schedule of small and medium-sized bakeries. Overall, bakery display cases are evolving from 'display equipment' to a dual carrier of 'brand experience and food safety.'
