The global Refrigerated Display Cabinets market size is expected to reach \$ 30963 million by 2032, rising at a market growth of 5.1% CAGR during the forecast period (2026-2032).

Refrigerated display cases are commercial refrigeration equipment used in supermarkets, convenience stores, and restaurants to display and preserve food and beverages. The upstream of the industry chain includes suppliers of refrigeration compressors, refrigerants, glass, and metal components, while the downstream includes retailers, restaurant chains, and logistics companies. In 2025, the global average price of refrigerated display cases was approximately US\$2,500 per unit, with sales of approximately 8.5 million units and global production capacity of approximately 10.2 million units, resulting in an industry profit margin of approximately 10%.

The refrigerated display case market is expected to maintain steady growth in the future, primarily driven by the expansion of the retail and catering industries, especially the development of supermarket chains, convenience stores, and cold chain logistics. As consumers increasingly demand food safety, freshness quality, and energy efficiency, high-efficiency, energy-saving, and intelligent refrigerated display cases will become the market mainstream. Simultaneously, technological innovation and the use of sustainable materials will drive product upgrades, contributing to increased industry profit margins and market expansion.
