The global Refrigerated Supermarket Display Cases market size is expected to reach \$ 10203 million by 2032, rising at a market growth of 3.9% CAGR during the forecast period (2026-2032).

Refrigerated supermarket display cases are commercial refrigeration equipment designed specifically for large supermarkets, fresh food markets, and chain retail channels. They are used for the visual display and temperature-controlled preservation of dairy products, beverages, fruits and vegetables, meats, and cooked foods within a 0–10°C temperature range. Their core value lies in solving problems such as perishable goods, temperature fluctuations, insufficient display efficiency, frequent restocking, and food safety risks through large-capacity display, stable temperature control, and high transparency. They are a core piece of equipment in modern supermarket cold chain systems. Refrigerated supermarket display cases are an infrastructure that integrates 'display, preservation, and sales efficiency,' making them a key asset in fresh food retail. The average price of this product is approximately US\$500 per unit, with global sales of approximately 15 million units.
