According to our (Global Info Research) latest study, the global Refrigeration Oil market size was valued at USD 945.6 million in 2023 and is forecast to a readjusted size of USD 1130.5 million by 2030 with a CAGR of 2.6% during review period.

Refrigeration oil is the one that easily mixes with refrigerant and flows throughout the system while the refrigeration cycle is on. It doesn't freeze at lowest operating temperatures maintained in the specific system. It's freezing temperature is always 5 times lower than that of the system temperature at which it's operating. It's compatible with refrigerant properties. It's flash point should be high. it's non flammable and its viscosity should be in such a way that it enables in lubrication of all the mechanical components within the compressor.

APAC is estimated to be the largest refrigeration oil market in 2018 in terms of both, value and volume. It is also estimated to witness the highest growth during the forecast period. This growth can be attributed to the rise in the manufacturing of consumer appliances and automobiles in the region. Furthermore, the changing lifestyle of consumers and their rising income levels have led to a higher demand for refrigerators, freezers, and air conditioners, which, in turn, drives the refrigeration oil market. The growing demand for perishable food products along with growth in the pharmaceutical industry also drives the demand for refrigerators and freezers, further fueling the growth of the refrigeration oil market in the region.
