Tunnel construction is an underground environment where personnel need a place to go in an emergency where breathing or physical protection can be provided, such as in the case of a release of toxic gases/fumes and the exit route is blocked. Tunnel construction refuge chambers are equipped with a breathing gas system to protect personnel from fumes or gases until a rescue team can arrive on site to get them out safely. The structure of the refuge chamber is also adapted to provide physical protection. There are portable refuge chambers and refuge chambers installed on tunnel boring machines.
