A refuse compactor commonly known as garbage or trash compactors are modern day machines for collection and compression of garbage, which in turn helps in reducing waste volume and offers high saving on waste disposal. Refuse compactors offers several benefits such as it enables to spillage of waste, and allows much higher amount of waste to get stuffed, thus saving significantly on fuel, as this reduces the number of round trips. Also, as it compacts the waste significantly, the landfill volume required reduces, saving a large share of municipalities' money. The waste collected through these compactors are pushed out of the container through a hydraulic mechanism. Most companies under refuse compactor landscape offers a variegated range of products, depending upon size and needs.
