The global Reinforced Polyurethane Foam (RPF) market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Reinforced Polyurethane Foam) is a polyurethane foam with layers of continuous strand fiberglass throughout the polyurethane matrix. Reinforced Polyurethane Foam (RPF) Boards are used for structural and semi-structural applications in a variety of industries. Layers of fiberglass reinforce the high-density boards, adding strength. The boards are inherently rotresistant, providing long-lasting structure. The lightweight boards are an excellent replacement material for plywood and other commonly used core products.
