## Abstracts

According to our (Global Info Research) latest study, the global Release Liners market size was valued at USD 5567 million in 2023 and is forecast to a readjusted size of USD 7871.1 million by 2030 with a CAGR of 5.1% during review period.

A release liner is a material made up of paper or plastic which functions as a carrier for the pressure-sensitive label stock. It has specialized non-stick coatings on one or both ends. It is coated with a release agent on one or both sides, which prevents it from making bonding with the material. The release agent stimulates release effect against any material coated with adhesives. Release liners protect the adhesive prior to its initial application
