Replacement surge modules are plug-in components used in modular surge protection devices (SPDs) to restore protection after a surge event. Designed for ease of maintenance, these modules can be quickly swapped out when they become depleted or damaged, without the need to replace the entire SPD unit. They help ensure continuous protection of electrical systems against voltage spikes, reduce downtime, and lower long-term maintenance costs. Commonly used in industrial, commercial, and residential electrical panels, replacement surge modules are essential for maintaining reliable and safe power distribution.
