## Abstracts

According to our (Global Info Research) latest study, the global Resettable PPTC Fuse market size was valued at US\$ 261 million in 2025 and is forecast to a readjusted size of US\$ 318 million by 2032 with a CAGR of 2.9% during review period.

Resettable PPTC fuse is a type of overcurrent protection device that automatically resets after the fault condition is removed. It consists of a polymer material that increases its resistance significantly when heated by excessive current. Once the current returns to a normal level, the fuse cools down and returns to its low-resistance state, ready to protect the circuit again. Therefore, Resettable PPTC fuses can be used to protect circuits that are subject to repetitive overcurrent.

Asia-Pacific is the largest and fastest-growing market due to its role as a global manufacturing hub for consumer electronics, automotive, and industrial systems.

From the perspective of product types, SMD PPTC fuses have gained significant dominance in the market due to their advantages in modern electronics manufacturing and application versatility. It is projected to grow from US\$ 188.94 million in 2024 to US\$ 225.93 million by 2030.

In term of products application, the Consumer Electronics market is presently the largest downstream market for Resettable PPTC Fuses. And it achieved USD 96.54 million in 2023, accounting for approximately 35.44% of the global market.

The major global manufacturers of Resettable PPTC Fuse include Littelfuse, Eaton, Wayon Electronics, Bel Fuse, Thinking Electronic, etc. In 2023, the world's top three

vendors accounted for approximately 49.34% of the revenue.

Resettable PPTC fuses offer a host of advantages over traditional fuses, making them the preferred choice in many modern applications. Their ability to reset after a fault condition eliminates the need for constant replacement, reducing maintenance costs, downtime, and risk of circuit damage. Additionally, their compact size, enhanced safety features, and environmental benefits make them a superior solution in consumer electronics, automotive systems, industrial equipment, and IoT devices.
