The global Residential Ventilator market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

In Thailand market, key players of residential ventilator include Panasonic, Carrier, Johnson Controls and Daikin Industries. Panasonic is the largest manufacturers of residential ventilator in the Thailand, which has a share about 54%. In terms of product, bidirectional flow with heat recovery is the largest segment, with a share about 53%. And in terms of application, the largest application is multifamily, which has a share about 89 percent.

Residential ventilation is the process of exchanging stale indoor with outdoor air to keep the home comfortable. Especially with the outbreak of the COVID-19, some countries pay more attention to the ventilation of the room. Some areas even require forced ventilation, such as Japan. Residential Ventilator is the equipment that provides fresh air to the home, usually with two fans and two duct systems. Fresh air supply and vents can be installed in each room. The most effective ventilation systems include a heat-recovery ventilator (HRV) or energy-recovery ventilator (ERV)-similar appliances that transfer heat (but not air) between a ventilation system's exhaust and supply air streams.
