Water softeners are systems that remove hard water minerals such as calcium and magnesium from water, which can cause damage to appliances, pipes, and fixtures. Residential water softener consumables are the replacement parts and accessories needed to keep these systems functioning properly.

In recent years, especially after the Covid-19 pandemic, The World Health Organization (WHO) organizes many campaigns to raise awareness regarding health and safety issues among individuals. Such campaigns are often aimed at educating the population regarding the causes of illness due to water-borne diseases. According to the WHO, unsafe drinking water, sanitation, and hand hygiene lead to approximately 4 billion cases of diarrhea, every year, across the globe. The consumption of impure water or contaminated water is directly linked to the occurrence of several diseases, including cholera, diarrhea, dysentery, and typhoid. The rising cases of cholera and other serious illnesses such as guinea-worm disease, typhoid, and dysentery are increasingly prompting individuals to drink pure water, Water softeners are excellent water purification systems that will protect residential homes from the harmful effects of hard water scale build-up.
