The food industry, including sauces, condiments, and edible oils, also contributes to the demand for bottle caps. Additionally, the pharmaceutical and personal care industries are key sectors that utilize bottle caps and closures.

Resin is a synthetic material commonly used in various industries, including the manufacturing of bottle caps. In the context of bottle caps, resin is used as a coating or sealant to provide a protective layer on the cap's surface. This resin coating helps prevent leakage, maintain freshness, and protect the contents of the bottle from external factors such as air, moisture, and contaminants.
