According to our (Global Info Research) latest study, the global Resistance Welding Machine market size was valued at USD 1037.2 million in 2023 and is forecast to a readjusted size of USD 1340.5 million by 2030 with a CAGR of 3.7% during review period.

Resistance welding is a welding technology widely used in manufacturing industry for joining metal sheets and components. The weld is made by conducting a strong current through the metal combination to heat up and finally melt the metals at localized point(s) predetermined by the design of the electrodes and/or the work pieces to be welded. A force is always applied before, during and after the application of current to confine the contact area at the weld interfaces and, in some applications, to forge the work pieces.

Global Resistance Welding Machine key players include ARO Technologies, Fronius International, Nippon Avionics, etc. Global top three manufacturers hold a share over 20%.
