According to our (Global Info Research) latest study, the global Restriction Endonucleases Products market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

Restriction endonucleases are also referred to as 'restriction enzymes.' Restriction endonucleases are enzymes that cleave the DNA within or adjacent to a specific DNA sequence known as a restriction site. Each restriction enzyme is only capable of recognizing or identifying a single or a few restriction sites. Once these enzymes have identified and bound to the restriction sites, they cut the DNA at or near these sites.
