Abstracts

According to our (Global Info Research) latest study, the global Restructuring Advisory Service market size was valued at US\$ 1152 million in 2025 and is forecast to a readjusted size of US\$ 1677 million by 2032 with a CAGR of 5.3% during review period.

Restructuring Advisory Service refers to comprehensive professional services provided by professional consulting firms or investment banks to companies facing financial difficulties, business restructuring, or strategic transformation. Its core objective is to help companies improve their financial condition, enhance operational efficiency, resolve business crises, or achieve strategic transformation through systematic diagnosis and optimization of their assets, liabilities, equity structure, business portfolio, and organizational structure.

In the cost structure of Restructuring Advisory Services, human resource costs account for the largest share (approximately 60%-70%), including salaries for senior partners, industry experts, financial analysts, legal advisors, and on-site project fees. Project operating costs account for approximately 15%-20%, covering due diligence, data modeling, and third-party assessments. Marketing and branding costs account for approximately 10%-15%, as the industry is highly dependent on reputation and client referrals. Gross profit margins show significant differentiation; top-tier institutions, leveraging brand premiums and complex transaction capabilities, can achieve gross profit margins of 50%-60%; mid-to-lower-tier institutions, with weaker bargaining power, generally have gross profit margins of 30%-40%.

The market exhibits a pattern of dominance by Europe and the US, with emerging markets in the Asia-Pacific region leading the growth. North America and Europe are

the core global markets (accounting for approximately 70% combined), benefiting from mature corporate bankruptcy laws, an active M&A market, and restructuring demand driven by private equity funds. The Asia-Pacific market is the fastest-growing region, particularly in China, Japan, and South Korea, where demand has surged due to economic restructuring, real estate debt restructuring, and corporate transformation and upgrading. However, the market is relatively fragmented, with local institutions and international giants competing simultaneously.
