Reticle Storage Pod is a precision semiconductor container used to store and transport photomasks or reticles during semiconductor manufacturing processes. It protects reticles from particles, electrostatic damage, humidity, and mechanical impact. The product is mainly used in semiconductor fabs, photomask production, and advanced lithography processes. The product boundary excludes wafer shipping boxes, FOUPs, and general cleanroom containers.

The industry chain includes upstream high-purity plastics, antistatic materials, sealing components, filters, precision molds, and cleanroom processing equipment. Midstream manufacturers conduct injection molding, cleaning, assembly, inspection, and contamination control. Downstream demand comes from semiconductor fabs, photomask manufacturers, lithography process suppliers, and semiconductor logistics providers.
