## Abstracts

The global Reverse Vending Machine (RVM) market size is expected to reach \$ 616 million by 2032, rising at a market growth of 2.8% CAGR during the forecast period (2026-2032).

A reverse vending machine is a device that accepts used (empty) beverage containers and returns money to the user. The machines are popular in places that have mandatory recycling laws or container deposit legislation. In some places, bottlers paid funds into a centralized pool to be disbursed to people who recycled the containers. Any excess funds were to be used for general environmental clean-up.

Global reverse vending machine key players include Tomra, Diebold Nixdorf, SIELAFF, Incom recycle, Envipco etc. Global top 1 manufacturer hold a share over 65%.

Europe is the largest market, with a share over 65%, followed by United States and China, both have a share over 30% percent.

In terms of product, non-refillable type is the largest segment, with a share over 60%. And in terms of application, the largest application is supermarkets followed by utilities.
