Abstracts

According to our (Global Info Research) latest study, the global Rezvilutamide market size was valued at US\$ 193 million in 2025 and is forecast to a readjusted size of US\$ 598 million by 2032 with a CAGR of 13.1% during review period.

In 2025, global Rezvilutamide production reached approximately 2.1 million units. Relugolix is an orally administered small-molecule gonadotropin-releasing hormone (GnRH) receptor antagonist. It exerts its therapeutic effects by inhibiting the hypothalamic-pituitary-gonadal (HPG) axis, thereby rapidly reducing the levels of testosterone or estrogen in the body. The drug is widely used in the treatment of hormone-dependent conditions, such as prostate cancer, uterine fibroids, and endometriosis. Compared with traditional GnRH agonists, relugolix has a faster onset of action and does not cause an initial hormone "flare-up" effect, offering improved safety and tolerability. It represents an important advancement in the field of endocrine therapy in recent years.

Relugolix, as a new-generation oral gonadotropin-releasing hormone (GnRH) receptor antagonist, is in a rapidly growing phase within the hormone-regulating therapeutics market. Driven by the increasing incidence of hormone-dependent diseases such as prostate cancer, uterine fibroids, and endometriosis, along with population aging and the advancement of precision medicine, demand for related treatments continues to rise steadily. Compared with traditional injectable GnRH agonists, relugolix offers advantages including oral administration, rapid onset of action, and no hormone "flare-up" effect, significantly improving patient compliance and optimizing the treatment experience, thereby enhancing its clinical penetration. Meanwhile, with the continuous expansion of indications and the development of combination therapies, its market potential in both male oncology and women's health is further expanding. Overall,

relugolix is expected to maintain strong growth in the future and become an important driver in the field of endocrine therapy.
