Abstracts

RF Coax Connectors are typically used to connect coaxial cable, Micro strip line or other RF transmission lines, with the functions of transmission line electrical connection or separating, and different type transmission line switching.

RF Coax Connector is an electrical connector designed to work at radio frequencies in the multi-megahertz range. It can not only be used in the field of wireless communications, but also be widely used in the field of satellite, radar, computers, televisions, cell phones, electronic equipment, aerospace, medical devices and other fields.

Scope of the Report:

This report focuses on the RF Coax Connector in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

At present, in developed countries, the RF coax connector industry is generally at a more advanced level. Meanwhile, foreign companies have more advanced equipment, strong R & D capability, and leading technical level. However, foreign companies' manufacturing cost is relatively higher, compared with Chinese companies. With the development of China RF coax connector production technology, their share in the international market is increasing, and competitiveness in the international market gradually increases.

China's RF coax connector industry has developed into a national wide status with certain research and production capacity, industry product mix has gradually improved, currently. China has become a large international consumption and production country

of RF coax connector, but the production technology is relatively laggard to produce some low-end product. Although the new production lines are increasing, and the high-end product is still relying on import.

There are a vast number of producers all vying for market share and trying to take market share from each other. For the North American power cords industry, the major competition comes from the Asia-Pacific region, especially from China, Taiwan and Vietnam, etc. The cheaper labor in these countries makes the RF coax connector production cost decrease. With globalization came lower trade barriers and therefore low cost power cords flooded the developed countries' RF coax connector market making the local RF coax connector industry struggle to survive. Despite the presence of competition problems, due to the clear global recovery trend, investors are still optimistic about this area. In future there will be more new investment enter into the field.

The worldwide market for RF Coax Connector is expected to grow at a CAGR of roughly 5.4% over the next five years, will reach 4940 million US\$ in 2023, from 3610 million US\$ in 2017, according to a new GIR (Global Info Research) study.
