RF is Radio Frequency treatment, a cosmetic treatment that works on tightening the skin. Works on sending an electric current at radio wave frequencies into the deep layers of the skin to stimulate collagen and elastin production via a protective water or glycerin-based gel. The device works to break it down with heat and reshape it. After that, your skin begins to produce more collagen and elastin, then your skin gets rid of toxins and is nourished with oxygen and nutrients, which makes your skin more healthy and more vibrant.
