According to our (Global Info Research) latest study, the global RGB Laser Modules market size was valued at USD 334.4 million in 2023 and is forecast to a readjusted size of USD 1437.3 million by 2030 with a CAGR of 23.2% during review period.

RGB lasers are show laser systems with exactly three-color modules: red, green and blue. Commonly used wavelengths of semiconductor laser diodes for RGB laser manufacturing are 635-660nm for red color, 520nm for green color and 445-460nm for blue color lasers. Laser modules include a separate photo detector device which is used to 'measure' the light output and provide feedback to the driver. The advantages of laser sources include high definition, high brightness, and focus-free projection. The RGB laser module are suitable for a variety of applications because of its stable optical and electrical characteristics, such as small projectors, Laser Lighting and various industrial and medical light source.

Global RGB Laser Modules key players include Opt Lasers, Sumitomo Electric, Kvant Lasers, SwissLas, Elite, etc. Global top five manufacturers hold a share about 75%. Europe is the largest market, with a share about 50%, followed by Japan and China, both with a share about 20 percent. In terms of product, 1W to 5W is the largest segment, with a share about 40%.
