## Abstracts

The global RGB LED Light market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

RGB LED light is a kind of LED lamp beads, it has a variety of colors. RGB LED lights are composed of red, green and blue mixed light. In addition, there are blue LEDs with yellow phosphors and UV LEDs with RGB phosphors. The colors of some LED-backlit panels are particularly clear and bright, even to the extent of high-quality TVs. This situation is characteristic of RGB. It advertises that red is red, green is green, and blue is blue. In terms of light color mixing, it has more diversified characteristics.

In terms of applications, RGB is obviously more diverse than white LEDs, such as car lights, traffic signs, and shop windows. When you need to use a certain band of light, RGB can mix colors as you like. In comparison, white LEDs are at a disadvantage. So of course it is stronger in effect. On the other hand, if RGB LED lights are used in lighting, it will be more disadvantageous, because in lighting it mainly depends on the luminous flux, lifespan and pure color of white light. At present, RGB LED lights are mainly used in decorative lights.

The imaging principle of RGB lights: RGB lights are formed by the intersection of three primary colors. In addition, there are also blue LEDs with yellow phosphors, and ultraviolet LEDs with RGB phosphors. Generally speaking, these two have their imaging principles, but the attenuation problem is related to The impact of ultraviolet rays on the human body is a problem that is difficult to solve in the short term. Therefore, although they can all meet the needs of white light, they have different results.

The control of RGB lights still needs to be strengthened. For example, if one of the

lights is broken, it will be quite obvious on the entire screen. On the contrary, white LED lights can complement each other, because they are side-beamed, so they can complement each other. A broken LED, and the uniformity made up, so that the overall condition does not look too bad.
