The global RGBW LED Strip Lights market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

RGBW LED strip lights are a type of LED lighting that consists of individual light-emitting diodes (LEDs) arranged in a strip or tape. The 'RGBW' acronym stands for Red, Green, Blue, and White, which represents the different colors that can be produced by these LEDs. The RGB LEDs are capable of producing a wide range of colors by combining different intensities of red, green, and blue light. The addition of the white LEDs provides a pure white light option, allowing for more versatility in lighting applications.
