A rheometer is a device used to measure rheological properties in which a liquid, suspension or slurry flows in response to applied forces such as the viscosity, plasticizing rate, power and etc.. It is used for those fluids which cannot be defined by a single value of viscosity and therefore require more parameters to be set and measured than is the case for a viscometer.

Scope of the Report:

This report focuses on the Rheometer in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. At present, in the foreign industrial developed countries the rheometer industry is generally at a more advanced level. Manufacturers of rheometers are mainly in America, Austria, UK and Germany, which occupied most of the market share of production in total in 2016. TA Instruments in the USA is the leader of rheometer in global market, others famous manufacturers are Anton Paar, Thermo fisher, Scientific, Malvern, Brookfield and KROHNE Group.

The rheometer industry is a high concentration industry. The illustrious manufacturers are TA Instruments, Anton Paar and Thermo fisher Scientific. The total market is monopolized by the above companies.

Along with the development of Chinese domestic Industrial technology, Chinese rheometers have been made a lot of progress, but it also has a long way to be advanced in the world, especially in high-end products. Otherwise, most of Chinese

companies are rather small, compared to other countries' companies.

The applications of rheometers are polymers, petrochemicals and other applications, such as food industry and rheometer. Polymers and petrochemicals industry are the major application by value, which accounts for more than 62.02% of total market.

However, the high cost of the systems and effectiveness of the device are the major factors hindering the growth of this market. In the future, the manufacturers who want to occupy the market must depend on market mechanism reform, core technology improvement, manufacturing equipment innovation, brand establishment and customer training and service enhancement.

The worldwide market for Rheometer is expected to grow at a CAGR of roughly 2.3% over the next five years, will reach 130 million US\$ in 2023, from 120 million US\$ in 2017, according to a new GIR (Global Info Research) study.
