According to our (Global Info Research) latest study, the global Rheometer market size was valued at USD 131.7 million in 2023 and is forecast to a readjusted size of USD 154.4 million by 2030 with a CAGR of 2.3% during review period.

A rheometer is a device used to measure rheological properties in which a liquid, suspension or slurry flows in response to applied forces such as the viscosity, plasticizing rate, power and etc.. It is used for those fluids which cannot be defined by a single value of viscosity and therefore require more parameters to be set and measured than is the case for a viscometer.

Global Rheometer key players include TA Instruments, Anton Paar, Thermo fisher Scientific, Malvern, Brookfield etc. Global top five manufacturers hold a share over 70%.

Europe is the largest market, with a share over 30%, followed by North America and Asia-Pacific, both have a share over 50% percent.
