Ribbon fiber optic jumper is a type of fiber optic jumper, also known as flat fiber optic jumper. Unlike traditional round fiber optic patch cords, ribbon fiber optic patch cords have a flat linear design, making them more suitable for routing in tight spaces, while also providing higher density and better airflow. Ribbon fiber jumpers are usually used in data centers, server cabinets, network equipment and fiber optic communication systems, etc. They can be connected to various devices through different interfaces and transmit high-speed data signals between devices. Common interface types for this type of fiber optic jumper include LC, SC, ST, and MTP.
