A Rifle Silencer is a device specifically designed to reduce the noise generated by a rifle when it is fired. This attachment is mounted on the rifle's barrel and works by altering the path of the sound waves produced by the explosion of the propellant in the chamber, or by absorbing the sound waves using acoustic materials. The primary purpose of a rifle silencer is to protect the shooter's hearing and to minimize the disturbance to the surrounding environment during shooting. Rifle silencers are commonly used in military, law enforcement, and civilian shooting applications.
