## Abstracts

The global Rigid Expanded PVC Sheet market size is expected to reach \$ 2342 million by 2032, rising at a market growth of 3.9% CAGR during the forecast period (2026-2032).

Rigid Expanded PVC Sheet is a lightweight, rigid plastic material produced by foaming polyvinyl chloride (PVC) resin into a closed-cell structure. It combines low weight with good mechanical strength, chemical resistance, and ease of fabrication, making it widely used in applications such as advertising signage, construction panels, furniture, and industrial boards. The material can be manufactured in different densities, thicknesses, and surface finishes, allowing it to meet diverse requirements ranging from indoor decorative use to outdoor weather-resistant applications.

In 2025, the global production of Rigid Expanded PVC Sheet reached approximately 2.3 million tons, with an average price of around USD 934 per ton, indicating a relatively mature and cost-competitive market. Demand is primarily driven by the advertising and construction sectors, particularly in Asia-Pacific, where large-scale manufacturing capacity and cost advantages support global supply. The industry is characterized by moderate entry barriers, with competition largely based on cost efficiency, product quality, and the ability to offer customized specifications.

In terms of profitability, Rigid Expanded PVC Sheet typically exhibits moderate gross margins in the range of 15% to 25%, depending on raw material costs (especially PVC resin), energy prices, and product positioning. Commodity-grade products tend to operate at the lower end of the margin range due to intense price competition, while higher value-added segments such as UV-resistant, fire-retardant, or co-extruded sheets can achieve relatively higher margins. Overall, margin stability is closely tied to

fluctuations in upstream petrochemical prices and the level of differentiation in downstream applications.

This report studies the global Rigid Expanded PVC Sheet production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Rigid Expanded PVC Sheet and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
