According to our (Global Info Research) latest study, the global Rigid Foam Insulation Sheet market size was valued at US\$ 158 million in 2024 and is forecast to a readjusted size of USD 194 million by 2031 with a CAGR of 3.0% during review period.

The rigid foam insulation sheet market has been experiencing growth and evolving in recent years. Here are some key trends in this market:

- 1. Increasing demand for energy-efficient buildings:** The demand for energy-efficient buildings is on the rise globally, driven by the need to reduce energy consumption and address climate change concerns. Rigid foam insulation sheets are widely used in building envelope applications to improve thermal performance and reduce heat transfer. As the demand for energy-efficient buildings continues to grow, the demand for rigid foam insulation sheets is expected to increase.
- 2. Stringent building codes and regulations:** Governments and regulatory bodies are implementing stringent building codes and regulations to promote energy efficiency and reduce greenhouse gas emissions. These regulations often require the use of insulation materials with specified thermal resistance values. Rigid foam insulation sheets, with their high thermal resistance properties, are well-suited to meet these requirements. The compliance with building codes and regulations is driving the adoption of rigid foam insulation sheets.
