According to our (Global Info Research) latest study, the global Rigid Insulation market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Rigid insulation is a building material used to provide thermal resistance to walls, foundations, and roofs. It is available in formed or extruded sheets of varying sizes, which are made from polystyrene or polyurethane. This material helps to improve the energy efficiency of a home by keeping cold or hot air from penetrating the walls. The thermal resistance of rigid insulation is measured by the material's R-value. Higher R-values mean that the material is more resistant to temperature transfer, while low R-values mean that air can easily pass into or out of the home.

The major players in United States Rigid Insulation market include DOW, Owens Corning, Insulfoam (CCL), etc. The top 3 players occupy about 60% shares of the whole market. Expanded Polystyrene (EPS) is the main type, with a share about 60%. Residential is the main application, which holds a share about 60%.
