Abstracts

The global Rigid Video Borescope market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Rigid borescope (industrial endoscope) is a rigid visual inspection instrument employing optical lens systems to transmit an image directly to the eyepiece from the inspection object. A fiber bundle is used to illuminate the inspection area. Rigid borescopes provide higher image resolution and quality than the flexible fiberscope due to the direct glass rod lenses system.
