According to our (Global Info Research) latest study, the global Riser Pole Arrester market size was valued at US\$ 141 million in 2024 and is forecast to a readjusted size of USD 174 million by 2031 with a CAGR of 3.0% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

A Riser Pole Arrester is a special type of surge arrester mounted at the riser pole — where overhead power lines connect to underground cables. Its job is to protect both the overhead line, and the underground cable from lightning strikes and switching surges. Because the transition between overhead and underground wiring is vulnerable (especially to lightning), riser pole arresters are installed right at that point to catch and divert surges to ground before they can enter the underground system and cause major damage.
