Annual production capacity is 15 million units. Gross Profit Margin: 30%. RNase/DNase-Free Tips are disposable pipette tips specially manufactured to eliminate ribonuclease (RNase) and deoxyribonuclease (DNase) contamination, ensuring integrity of RNA and DNA samples during molecular biology workflows. The RNase/DNase-Free Tips industry chain starts with high-purity polypropylene resin suppliers, followed by precision injection molding and sterile manufacturing by lab consumables companies, then quality testing for RNase/DNase-free certification, and finally distribution through scientific distributors, e-commerce platforms, and direct sales to research labs, clinical diagnostics, biotech, pharmaceutical, and forensic laboratories. RNase/DNase-Free Tips are essential for preserving the integrity of RNA and DNA samples; even minor contamination can compromise experiments, making these tips a small but critical investment in reliability and reproducibility in molecular biology, diagnostics, and genomics workflows.
