Abstracts

The global Road Cold Recyclers and Stabilizers market size is expected to reach \$ 1025.3 million by 2030, rising at a market growth of 3.9% CAGR during the forecast period (2024-2030).

Asia-Pacific dominates the market owing to initiatives by the government, ongoing projects, and increased investment in the region.

The cold recycler uses the milling and mixing rotor to mill asphalt pavements, granulates them, sprays binder and water in precisely measured doses, and mixes it all together in a single operation. Cold recycling equipment is used for the in-situ recycling of pavement layers. It is an environmentally friendly paving method providing considerable cost savings over traditional methods. Currently, the typical models of Road Cold Recycling Machines include WIRTGEN 's WR series cold recyclers, Bomag 's RS series Recyclers & stabilizers and XCMG's XLZ series Cold Recycler, etc.

This report studies the global Road Cold Recyclers and Stabilizers production, demand, key manufacturers, and key regions.
