Abstracts

The global Road Traffic Guidance Screen market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The road traffic guidance screen provides the driver with the direction of the road ahead in a graphical way that presents the outline of the overall road route, which has the function of a guidepost; the LED variable light strip is embedded in the road section identification area of the static graphic, and the different colors of the LED emit light to create an image. Mark the real-time road conditions of these road sections in the state of smooth (green), congested (red) or congested (orange), for the driver to judge and choose the appropriate driving route, and play the role of traffic guidance.
