The global Road Transport Refrigeration Equipment market size is expected to reach \$ 13800 million by 2032, rising at a market growth of 4.3% CAGR during the forecast period (2026-2032).

Road Transport Refrigeration Equipment is the vans or trucks used for transportation of fresh products or frozen products.

First, for industry structure analysis, the Road Transport Refrigeration Equipment industry is relatively concentrated. These manufacturers range from large multinational corporations to small privately owned companies compete in this industry. The top five producers account for about 55% of the revenue market. Regionally, North America is the biggest production value area of valves, also the leader in the whole Road Transport Refrigeration Equipment industry.

Second, North America occupied more than 30% of the production market. It is followed by Europe and Asian/Oceanian Countries, which respectively account for around 28% and 19% of the global total. Other countries have a small amount of production. Geographically, North America was the largest consumption market in the world, which took about 31% of the global consumption market.

Third, Van Refrigeration System and Bodies accounts for about half of the production market, while the market of Truck Refrigeration System and Bodies is a bit larger than that of Trailer Refrigeration System and Bodies. Food/Beverages and Plants/Flowers are the most common application of Transport Refrigeration Equipment.
