## Abstracts

The global Robot Brushless Hollow Cup Motor market size is expected to reach \$ 2460 million by 2032, rising at a market growth of 47.8% CAGR during the forecast period (2026-2032).

In 2025, global Robot Brushless Hollow Cup Motor production reached approximately 698 k units with an average global market price of around US\$220 per unit. A robot brushless hollow cup motor is a brushless DC motor designed specifically for robotic applications, featuring a hollow cup rotor structure that offers compact size, lightweight, and low inertia. This design enables fast response, high efficiency, and smooth operation, making it ideal for robot joints and precision drive systems. The brushless configuration reduces maintenance requirements and enhances durability and reliability, serving as a critical component in high-performance robotic power systems.

In the future, Robot Brushless Hollow Cup Motor will mainly exhibit trends of accelerated domestic substitution and deepened technical barriers. Domestic companies such as TBEA and Moons's are narrowing the gap with foreign giants like Switzerland's Maxon and Germany's Faulhaber by improving automation equipment levels, cutting into the humanoid robot dexterous hand supply chain with cost advantages, thereby significantly increasing market share and revenue scale. The mass production process of humanoid robots places higher demands for high power density, fast response, and low energy consumption on motors, which will promote the deepening application of hollow cup motor technology in traditional fields such as medical equipment and industrial automation, further expanding market space. In addition, industry competition will focus more on technological breakthroughs in core manufacturing links such as coil design and winding processes, and enterprises with high precision and reliability production capabilities will obtain higher profit premiums.

This report studies the global Robot Brushless Hollow Cup Motor production, demand, key manufacturers, and key regions.
