## **Abstracts**

This report studies the Robotic Pool Cleaner market. A robotic pool cleaner is a unit that runs from an outside power source rather than your pool's filtration system. It is sort of like a Roomba for your pool. They run on wheels or tank treads and have removable filter bags that you take out and clean after each use.

Robotic pool cleaners work independently from the filter and pump and are driven by an electric motor inside the unit. They are self-contained, collecting debris in a filter canister within the cleaner. Robotic pool cleaners have built-in intelligence that ensures they don't get stuck in corners and on steps and provide better coverage than alternative cleaners.
