Abstracts

Robotic welding is the use of mechanized programmable tools (robots), which completely automate a welding process by both performing the weld and handling the part. Processes such as gas metal arc welding, while often automated, are not necessarily equivalent to robot welding, since a human operator sometimes prepares the materials to be welded. Robot welding is commonly used for resistance spot welding and arc welding in high production applications, such as the automotive industry.

According to our (Global Info Research) latest study, the global Robotic Welding market size was valued at US\$ 10300 million in 2023 and is forecast to a readjusted size of USD 21790 million by 2030 with a CAGR of 11.4% during review period.

For the major players of Robotic Welding, Fanuc maintained its first place in the ranking in 2019, followed by ABB, Yaskawa, KUKA and Kawasaki Heavy Industries. Top 5 players accounted for 38% of the Global Robotic Welding revenue market share in 2019.

The manufacturer headquarters is mainly distributed in Europe, China, South Korea and Japan.
