## Abstracts

The global Robotics Repair and Maintenance Service market size is expected to reach \$ 1605 million by 2032, rising at a market growth of 6.1% CAGR during the forecast period (2026-2032).

Robot repair and maintenance services refer to professional maintenance, inspection and performance optimization services for various types of robot equipment such as industrial robots and service robots. This service covers a full range of content from daily cleaning and maintenance to troubleshooting and repair, as well as software upgrades and system debugging, aiming to ensure that the robot equipment is always in the best operating state, extend its service life, and improve production efficiency and work safety. Through regular professional maintenance and timely and effective maintenance response, enterprises can effectively reduce downtime and maintenance costs caused by robot failures, and ensure the continuity and stability of the production process.

With the rapid development of automation, intelligent manufacturing, and artificial intelligence technologies in global manufacturing, the scale of robot applications continues to expand, directly driving the rapid growth in demand for robot repair and maintenance services. The more robots there are, the stronger the demand for maintenance, upgrades, and continuous technical support, thus forming a stable long-term service market. Furthermore, enterprises are increasingly inclined to reduce downtime costs through predictive maintenance, remote monitoring, and AI diagnostic technologies, shifting maintenance services from traditional 'fault repair' to 'intelligent operation and maintenance.' In the future, with the widespread adoption of industrial robots, collaborative robots, and service robots, this industry will become a crucial service sector with stable growth and high profit margins within the robot industry chain,

gradually forming a new business model centered on data-driven operation and maintenance, cloud platform management, and Robots as a Service (RaaS).
