## Abstracts

The global Rock Bolting Rigs market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Rock bolting rigs are used in industries such as mining, construction, civil engineering, and geotechnical engineering, where the stability of rock formations is critical. The installation of rock bolts using these rigs helps to prevent rockfalls, improve safety in underground excavations, reinforce tunnel linings, stabilize slopes, and provide support for various structures.

Rock bolting rigs are specialized machines or equipment used for the installation of rock bolts in rock formations. Rock bolts are mechanical anchors designed to reinforce and stabilize the surrounding rock mass, particularly in underground excavations, tunnels, mines, and other applications where rock stability is crucial.
