According to our (Global Info Research) latest study, the global Roll Forming Machines market size was valued at USD 497.1 million in 2023 and is forecast to a readjusted size of USD 655 million by 2030 with a CAGR of 4.0% during review period.

Not only a roll forming machine can provide high quality products, but also decrease the human labour, time and increases the profit of business, thanks to the automation or continuous running. Other than roll forming, these machines perform a number of metalworking duties, including material cutting and roll punching.

Compared to regular metal fabrication equipment, like sheet metal press brake, metal sheet shearing machine, press machine, and straightening machine etc, a roll former line usually can do all the jobs, like bending, cutting, pressing for holes, straightening and even stacking.

China is the largest market for Roll Forming Machines with a market share of about 21%, followed by North America with a market share of about 17%. The Roll Forming Machines & Lines is classified into machines and lines according to the product type. Roll Forming Lines segment dominates the market contributing more than 94% of the total market share. Roll Forming Machines is major applied in Automotive, Construction and Building Materials and other industries; Automotive segment is the largest application area, with about 20% market share. Key players include Gasparini SpA, Dallan S.p.a., CS-KSPAN, DREISTERN GmbH & Co. KG, FAGOR ARRASATE, Formtek (Mestek), ASC Machine Tools, Inc., Qualitech Machinery LLC, Dimeco and EWMenn GmbH & Co. KG; the revenue of top ten manufacturers accounts about 35% of the total revenue.
