The global Roller Coaster market size is expected to reach \$ 5944 million by 2032, rising at a market growth of 4.4% CAGR during the forecast period (2026-2032).

Roller Coaster market, which is a type of amusement ride that employs a form of elevated railroad track designed with tight turns, steep slopes, and sometimes inversions. People ride along the track in open cars, and the rides are often found in amusement parks and theme parks around the world. LaMarcus Adna Thompson obtained one of the first known patents for a roller coaster design in 1885, related to the Switchback Railway that opened a year earlier at Coney Island. The track in a coaster design does not necessarily have to be a complete circuit, as shuttle roller coasters demonstrate. Most roller coasters have multiple cars in which passengers sit and are restrained. Two or more cars hooked together are called a train. Some roller coasters, notably wild mouse roller coasters, run with single cars.

Bolliger & Mabillard, Gerstlauer, Intamin and Vekoma Rides Manufacturing are the leaders of the Roller Coaster industry, which take about 25% market share. China is the major region of the global market, which takes about 32% market share.
