Abstracts

The global Roller Screws market size is expected to reach \$ 483 million by 2032, rising at a market growth of 19.5% CAGR during the forecast period (2026-2032).

Roller screw is a low-friction precision screw-type actuator, a mechanical device for converting rotational motion to linear motion. In 2024, global Roller screw production reached approximately 63.42 k units, with an average global market price of around US\$ 1888 per unit. Global production capacity in 2024 was approximately 83 k units. Key raw materials for roller screws include alloy structural steel and high-carbon chromium bearing steel; typical suppliers include Voestalpine, Nippon Steel, and Timken. Downstream applications are wide-ranging, encompassing aerospace, industrial automation, machine tools, robotics, medical equipment, and energy process control.

The global key companies of Roller Screws include Schaeffler (Ewellix), Bosch Rexroth, GSA, Rollvis, Nook Industries, August Steinmeyer, Moog, Tolomatic, Creative Motion Control, Lim-Tec, Power Jacks, Kugel Motion, KOFON, etc. In 2024, the global five largest players hold a share approximately 57.73% in terms of revenue. Ongoing growth in smart manufacturing and robotics creates major opportunities for high-load, high-precision linear motion technologies. The global roller screw market is experiencing steady growth driven by the rapid shift from hydraulic to electromechanical actuation across aerospace, automotive, industrial automation, and heavy-duty manufacturing sectors. Growing interest in high-efficiency, low-maintenance, and environmentally friendly actuation solutions is accelerating market penetration, particularly in Asia-Pacific. With increasing adoption of electric cylinders in place of hydraulic systems, the roller screw market is expected to maintain robust expansion over the next 5–7 years.

This report studies the global Roller Screws production, demand, key manufacturers, and key regions.
