Rollover Car Wash System is an automated car wash that completes the cleaning process by moving the machine back and forth along the vehicle track while the vehicle is stationary. It uses a series of spray systems, rotating brushes, and high-pressure water systems to automate the entire cleaning process from pre-washing, washing, rinsing, waxing, and air drying. The rollover car wash system is highly efficient, water-saving, and protects the car paint during the washing process, making it a common device in commercial car washes, gas stations, and other places.
